ELASTIC ADHESIVE BANDAGES

FISIOPLAST PLUS

98.5% cotton - 1.5% elastane Stretch 65% (low grade)
LATEX FREE

Elastic bandage with unhemmed edges and longitudinal stretch, zinc oxide-based adhesive. Porous, highly permeable to water vapor. With guide wire.

The bandage is easily adaptable to a wide variety of techniques and varying degrees of compression, thanks to its unhemmed edges, which facilitate application even on rough areas. Suitable for compression bandages in varicose vein and vascular treatments in general, functional bandages in orthopedics, support bandages for sprains, dislocations, bruises, and muscle strains, prevention and treatment of sports injuries, etc.

Individually packaged in cellophane or in a multi-pack for maximum hygiene.

Ref.	Packs of
775011 - 6 cm x 4.5 m stretched	10 pcs
775012 - 8 cm x 4.5 m stretched	10 pcs
775013 - 10 cm x 4.5 m stretched	10pcs
775014 - 10 cm x 4.5 m stretched	10pcs
775015 - 7.5 cm x 4.5 m stretched	10pcs

FISIOPLAST BIEL

100% cotton - Stretch: 70% length, 40% height LATEX FREE

Bi-elastic compression bandage with longitudinal and transverse stretch and hypoallergenic adhesive. The pure, unbleached cotton textile backing ensures effective support for the bandaged area. Completely free of chemical solvents and latex.

The medium-low stretch allows for the application of very strong compression even when the limbs are at rest, making FISIOPLAST BIEL the ideal bandage for medium- and long-term treatments. Individually packaged in cellophane or in a multi-pack for maximum hygiene.

Ref.	Packs of
772050 cm 6 x 4.5 m stretched	10 pcs
772051 cm 8 x 4.5 m stretched	10 pcs
772052 cm 10 x 4.5 m stretched	10 pcs

FISIOPLAST LIST

100% Cotton - Stretchability approximately 70% (medium grade)
LATEX FREE

Single-stretch adhesive bandage with external striped coating. Natural white color, loose hem. Highly hypoallergenic adhesive. For compression bandages for varicose veins, and for support in dislocations, sprains, and strains. Sports and functional bandages. Ideal for post-cast immobilization bandages, in FKT. The exclusive striped coating ensures excellent tolerability. Individually packaged in cellophane or in multiple boxes for maximum hygiene.

Ref.	Packs of
775001 cm 6 x 4.5 m stretched	10 pcs
775002 cm 8 x 4.5 m stretched	10 pcs
775003 cm 10 x 4.5 m stretched	10 pcs

SELF-ADHERENT ELASTIC BANDAGES

SELF-ADHESIVE SOFT LF

36% cotton, 26% viscose, 38% synthetic fibres - Stretchability approximately 80% (medium grade) LATEX FREE

White, single-stretch bandage. Self-adherent (cohesive), suitable for securing dressing pads and protective dressings for bruises, grazes, and hematomas.

Prevention and treatment of minor sports injuries, light support and preventative bandages.

Its exceptional softness and air permeability make it skin-friendly and easy to use. It easily and securely holds any dressing, wrinkle-free wrapping even around complex anatomical and joint areas.

Individually wrapped in cellophane or in a multi-pack for maximum hygiene.

CROHAFT LF

70% Cotton - 30% Polyamide. Stretch in length approximately 65%, in height approximately 50%. LATEX FREE.

Self-adherent (cohesive) bandage on both sides, poly-extendable, white. The bandage adheres to the underlying layer without sticking to skin, clothing, or hair. Suitable for securing dressings and for joint bandages. Thanks to its poly-extendability, it can be applied to any joint area, on any part of the body, even those with particularly irregular anatomical shapes, without causing wrinkles. Useful in phlebology for securing advanced dressings, and equally practical as a finishing touch on compression bandages to make the bandage more stable and long-lasting. Thanks to its wide, crimped weave, it is particularly soft to the touch and pleasant on the skin, allows for any movement, and is highly permeable to air.

The textured edges (to prevent fraying) are 20% looser than the body of the bandage, preventing a tourniquet effect and further promoting complete articular alignment. Extremely practical for securing casts and orthopedic and physiatric splints. Individually packaged in cellophane or in a multi-pack for maximum hygiene. Autoclavable.

SELF-ADHERENT ELASTIC BANDAGES

PHYSIOLASTIC COHESIVA PLUS MEDIA

98.1% cotton - 1.9% elastane
Average extensibility: > 70-140% LATEX FREE

Medium-stretch longitudinal bandage for support and compression.

Indicated for medium-strong, constant compression support bandages even when moving; Varicose symptomatic complex,

Antithrombotic prophylaxis, support and relief bandages for sprains, dislocations, contusions and tenosynovitis, minor fractures.

Prevention and treatment of sports and work-related injuries
The bandage's great versatility allows it to be used in a wide variety of situations, achieving the most optimal compression at the sole discretion of the specialist. The device should be applied to the affected area without any fastening material. Indeed, the uniformity of the cohesive material allows the bandage to effectively bond to itself, not to skin and hair.

Individually wrapped in cellophane for maximum hygiene and light protection

SELF-ADHERENT ELASTIC BANDAGES

Self-adhesive TNT

80% Polyester - 20% Elastane - Stretchability approximately 120% (medium grade) LATEX FREE

Skin-colored, single-stretch bandage. Self-adhesive. (Cohesive)

Suitable for orthopedic support bandages. In phlebology, it is ideal for medium-compression bandages.

Excellent for sports bandages due to its hold, resistance, lightness and breathability.

Used in veterinary medicine, especially for small animals, thanks to its self-fixing ability, it does not slip and does not adhere to animal fur.

Individually packaged in cellophane or in a multi-pack for maximum hygiene.

Ref.	Packs of
772062 cm 5 x 4.5 m stretched	10 pcs
772063 cm 7.5 x 4.5 m stretched	10 pcs

ZINC PASTE BANDAGES

ZINCOSAN COUMARIN

Backing: 100% Cotton - INELASTIC TYPE impregnated with zinc oxide paste (10% by weight) and coumarin. White color. LATEX FREE.

INELASTIC TYPE WITH COUMARIN. Pure cotton bandage impregnated with zinc oxide and coumarin. Indicated for the treatment of lymphedema, in combination with single- or two-way elastic compression or adhesive bandages. This bandage combines the anti-inflammatory effect of zinc oxide paste with the anti-edema properties of coumarin, ensuring excellent percutaneous absorption.

Excellent for post-thrombotic edema and lymphedema of both the upper and lower limbs. It has a positive therapeutic effect in the rehabilitation of complicated CVI without ulcers, while in complicated CVI with ulcers, it has a strong effect in promoting granulation and re-epithelialization. Bandaging is a key therapeutic tool in the treatment of phlebolymphe-
dema. Short-stretch (preferably) or medium-stretch bandages are commonly used to promote the reabsorption and drainage of fluids and stagnant proteins. Alongside traditional bandages, this bandage is available, based on the properties of zinc oxide (eutrophic, disinfectant, and anti-inflammatory) and, above all, the effects of plant-derived coumarin (pro-lymphokinetic, promoting the lysis and reabsorption of protein macromolecules).

For fixed bandages in cases of lymphedema, post-traumatic edema, and phlebolymphe-
dema. Individually packaged in aluminized cellophane.

PADDING PRODUCTS

PRONTOFOAM

100% medical grade polyurethane with high elasticity, omnidirectional

Polyurethane foam bandage and anti-decubitus adhesive strips.

High air permeability.

Suitable for general padding, skin or bone protrusion protection from aggressive adhesive bandages.

The strips are equipped with highly hypoallergenic adhesive.

Packaged in white cellophane bags for UV protection to prevent yellowing of the product.

Ref.	Adhesive Packs	
784001 cm 8 x 4.5 m tension mm 2	10 pcs	No
784002 cm 10 x 4.5 m with 2.5 mm brim	10 pcs	No

PRONTOMOUSSE

100% medical-grade polyurethane with high elasticity, omnidirectional. LATEX FREE

Polyurethane foam film, with high air permeability.

Indicated for skin protection from the action of particularly aggressive adhesive bandages, especially those based on rubber and benzene solvents.

Non-slip pre-bandage for functional bandages. Standard packaging consists of 10 or 48 loose pieces in a carton. Individually wrapped in cellophane is available upon request.

784011 cm 7 x 27.5 m	10 pcs
784015 cm 7 x 27.5 m	48 pcs

PRONTOGUM

100% rubber latex with remarkable elasticity

Rubber latex pads and strips.

To obtain targeted and eccentric compressions.

Can be cut and shaped with scissors.

The pads and strips can be shaped depending on the problem and the surface on which you are going to work.

The application must always be carried out with the smaller shape in contact with the skin and the larger one on top, in order to avoid unwanted lace effects.

PATCHES FOR FUNCTIONAL AND NEUROMUSCULAR BANDAGES

PHYSIOTAPE

Canvas fabric - Knurled edges, easily resectable.
LATEX FREE

INELASTIC PLASTER FOR FUNCTIONAL BANDAGES

Hypoallergenic adhesive with a high percentage of zinc oxide and rubber. Used for the preparation of functional bandages (in combination with elastic adhesive bandages or individually).

General orthopedic immobilizations and fixation of splints and Kramer splints.

Particularly suitable for sportswear given its sturdiness and the ease with which it tears thanks to the side knurling. Hospital-grade packaging.

MEDICATED PATCHES AND TABLETS

PRONTOROLL F

Made of elastic non-woven fabric with a continuous, non-adherent central pad made of non-woven fabric. Hypoallergenic adhesive mass made of water-dispersed polyacrylic resins. Indicated for first aid and emergency situations. The completely inert, absorbent pad allows the use of medicinal substances exclusively at the discretion of a physician, although the use of ointments and powders tends to reduce the product's gas permeability.

The use of the elastic adhesive support facilitates application in anatomically difficult areas, allowing for accurate protection.

Ref.	Hospital Pack from
770061 cm 4 x 5 m	1 pc
770062 cm 6 x 5 m	1 pc
770063 cm 8 x 5 m	1 pc

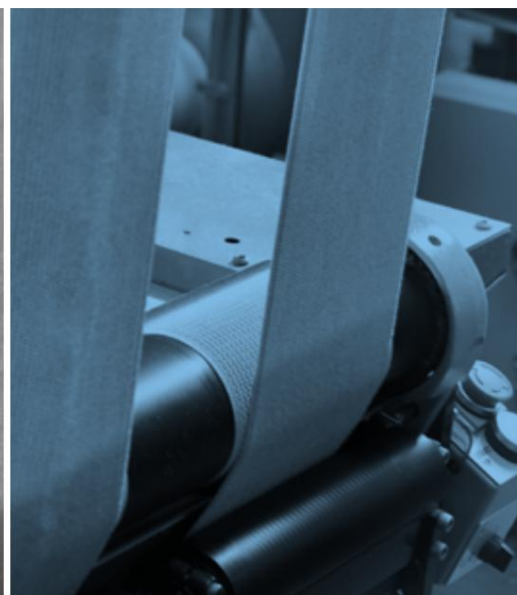

PRONTOSORB ADHESIVE

Made of elastic adhesive non-woven fabric with a non-adherent non-woven fabric center pad. Particularly suitable for dressings due to its high absorbency, equal to 13 times its weight.

It doesn't stick to the wound and stimulates rapid healing. The elastic adhesive backing is ventilated and hypoallergenic.

Fisiodur	10 cm x 5 mt.	1 pc	Very short stretch bandage (40%) from the heel to the knee

REPLACEMENT OF THE "Ulcus Cruris" KIT [Ref. #781998]

Bandage	Measure	Amount
Zincosan Coumarin	8 cm x 5 mt.	1 pc
Zincosan Coumarin	10 cm x 5 mt.	1 pc
Prontotube TG 7	8 cm x 2 mt.	1 pc

Filmar also offers simplified ulcer treatment kits, including a dressing and a series of bandages for creating multilayered bandages using the "telescopic" technique. Filmar also offers a series of lymphedema treatment kits for both the upper and lower limbs. For these kits, please refer to the online catalog at www.remmert.it.

ELASTOCOMPRESSIVE KITS FOR LYMPHATIC PATHOLOGIES

Disposable compression kit containing a multilayered treatment system for lymphatic disorders of all stages, including complete bandaging. The kit contains effective "zinc oxide and coumarin paste bandages" for use directly on the skin for improved edema absorption.

The LINFO KIT is designed and dedicated to medical professionals, physiotherapists, and nurses. Proper application requires knowledge and experience with lymphatic bandaging techniques.

After-sales assistance

Filmar, a Remmert medical brand, can provide you with technical and scientific advice at your premises, working with various experts depending on the type of product.

We are also available to organize courses on the use of our products, training courses for your staff, refresher courses and courses on how to optimize the use of Filmar products.

We have always attended the main national and international conferences and trade fairs in the sector, in order to maintain a high level of professional development while simultaneously staying in touch with the needs of specialists and all our customers.

GENERAL CONDITIONS OF SUPPLY: THIS CATALOGUE REPLACES THE PREVIOUS ONE AND IS IN EFFECT FROM 1 MAY 2026.

Supplies are governed by these conditions, unless otherwise specifically agreed in writing. Any changes during the supply period do not constitute a novation to the contract. Specifically, performance of the supply may be suspended at any time in the event of a change in the buyer's financial circumstances pursuant to Article 1461 of the Italian Civil Code.

PRICES

The prices in the current price list are valid subject to sudden currency or cost changes. Where advance notice is not possible, we inform you that such changes will be applied without notice. Please note: if the order does not comply with the product sales unit, we reserve the right to increase or decrease the unit.

MINIMUM ORDER

Orders under €300.00 excluding VAT cannot be processed. If goods are not shipped, the remaining balance will be automatically cancelled if the value is less than €50.00 excluding VAT.

TRANSPORT

Free shipping via our partner shipping company for orders over €2,000.00 net of VAT. Shipping and collection fees will apply for orders under this amount.

PAYMENT

Unless otherwise agreed, payment is due in cash upon delivery of the goods or prior to shipment. Payments are due within the agreed terms even in the event of delayed arrival of the goods and/or partial or total damage or loss during transport, as well as if the goods made available to the buyer by us are not collected by the buyer.

In case of late payments, current bank interest will be charged.

COMPLAINTS AND DISPUTES

Any complaints regarding the quality, quantity, or type of goods supplied must be communicated in writing within 8 days of the buyer receiving the goods. No complaint regarding the quality of the goods may be asserted, even as an exception, in court if the goods to which the complaint relates have not been duly paid. Any complaints regarding a single delivery of goods do not exempt the buyer from the obligation to collect the remaining quantity of goods within the limits of the order or commitment.

INSURANCE

Our goods are insured against all damage caused during transport, up to the CUSTOMER'S home.

The warranty is operational and therefore valid as long as the defects are detected upon delivery of the goods. These defects must be noted on the shipping company's delivery note with a reservation and the reason for the defect.

EXAMPLE: One package is missing. Package is damaged or wet, etc. Any complaint must be made in writing within 8 days of receiving the goods, by registered mail, addressed to the LOGISTICS OFFICE, and the incident must be announced by telephone.

Telephone: 011 996 1080.

Failure to follow this procedure may result in us being unable to respond to any damages.

FORCE MAJEURE

In any case of force majeure that prevents us from performing the contract or maintaining the conditions, we will be entitled to cancel the contract or, at our discretion, to request its performance within a period to be established.

COMMERCIAL RETURNS

Returns are not accepted without prior authorization. If this condition is not met, the goods will be automatically returned to the sender at the customer's expense, as clearly stated in the "GENERAL TERMS AND CONDITIONS OF SUPPLY".

Returns will not be accepted unless previously and expressly authorized by our Sales Office.

If this condition is not met, the returned goods will be automatically returned to the sender with the shipping costs charged.

In case of authorized return, this must take place only:

Delivered carriage paid to our warehouse (with the means of your choice) via 2) Carriage forward, when authorised by us, our partner courier.

NB The goods owned by the customer, destined for us, travel at the sender's expense and risk.

DISPUTES AND JURISDICTIONS

The exclusive jurisdiction of the Judicial Authority of TURIN is established, without prejudice to our will to express against the buyer before any competent Judicial Authority.
